New Normal

Jackie Flynn

How has the pandemic changed your daily life?

It changes my interactions with every one and greeting gestures (wave at 6 ft apart and no more hugging)

What positive things or unexpected moments of joy have come out of this experience?

Family bonding and more time of being at home together bring us more closer .

What has been the hardest aspect of this experience?

It's the daily needs especially food I have to get them in double so I don't run out easily

What are you nervous and/or excited about for the coming academic year?

I am nervous of the school reopening but trust that we are all in mind to be responsible of the mandated protocol

What is something you think should be preserved in public memory about this time?

Respect and trust I think We all have our own opinion but we have to have broad mind and understand that life sometimes been unfair but dealing with it instead of running away from it will get you somewhere .

What do you think we as a society should learn from this going forward?

As a society going forward I understand that each and every individual experiences differ but with only one goal to make it work no matter what .
