COVID-19 Umbrella Term to Operate a Fake Pandemic

Published on April 8, 2020

By Makia Freeman

AT A GLANCE...

- *THE STORY:*

People are dying around the world – that's real. But how many are genuine COVID-19 cases?

- *THE IMPLICATIONS:*

The main trick of the pandemic propaganda is to fool you into thinking that for COVID-19 there has to be 1 virus, 1 cause and 1 disease.

The NWO propagandists have tried to use the COVID-19 umbrella term as the basis for this pandemic. However, it's a trick. There are many causes and diseases all being placed under the COVID-19 umbrella term. The coronavirus fails Koch's postulates as it has still never been isolated!

The COVID-19 umbrella term

has been used in an absolutely unscientific, manipulative and deceptive way to justify this manufactured coronavirus crisis, which the evidence shows is a fake pandemic. The international lockdown which covers around 100 nations and at least 20% of the world right now is based upon the idea that there is a new distinct virus SARS-CoV2 which is spreading, infecting and causing the disease COVID-19. However, there are many key foundational questions which cannot be adequately answered. The most important of these is that **the virus itself has never been isolated nor thoroughly proven to be causing the disease** (or more accurately diseases) that people have! This is in addition to the obvious manipulation of the figures with false positives and other sleights of hand such as inflating the numbers by counting anyone who merely had the virus as "dead from" the virus. The coronavirus fails Koch's postulates. The Emperor has no clothes – and all the power grabs and emergency decrees are based on lies. We are not looking at 1 virus, 1 cause and 1 disease; we are looking a cluster of diseases and a variety of causes, hidden by the **COVID-19 umbrella term** to fuel the fake pandemic narrative.

COVID-19 Coronavirus Fails Koch's Postulates

German scientist Robert Koch (Heinrich Hermann Robert Koch, 1843-1910) made great contributions to the field of microbiology. He is considered to be one of the founders of the field of modern bacteriology. He identified the specific causative agents of TB (tuberculosis), cholera and anthrax. For his work on TB, he was awarded the Nobel Prize in 1905 in Physiology or Medicine. **Koch established 4 criteria to identify the causative agent of a particular disease.** These criteria have become a gold standard for determining the existence of an infectious agent and for isolating and verifying what is causing a disease. The criteria are a set of conditions known as Koch's postulates. They are:

1. The microorganism must be identified in all individuals affected by the disease, but not in healthy individuals.
2. The microorganism can be isolated from the diseased individual and grown in culture.
3. When introduced into a healthy individual, the cultured microorganism must cause disease.
4. The microorganism must then be re-isolated from the experimental host, and found to be identical to the original microorganism.

Firstly, the coronavirus SARS-CoV2 (allegedly causing the disease COVID-19) has not been shown to be present only in sick people and not in healthy ones. There are countless cases of people having this virus with mild, minor or zero symptoms. Recently Iceland tested a relatively large percentage of its population (around 5,000 people out of 364,000) and found that 0.86% (close to 1%) of Icelanders had the coronavirus. The symptoms? Little or none:

“Importantly, approximately half of the people who tested positive for COVID-19 are non-symptomatic, according to Gudnason as reported by [BuzzFeed](#). The other half is mostly showing “very moderate cold-like symptoms.”

Secondly, **the virus has never been isolated – which must be done with proper equipment** such as electron microscopes and which cannot be achieved through CT scans (as the Chinese were using) and the flawed PCR test (more on this below). The January 24th 2020 study published in the *New England Journal of Medicine* entitled *A Novel Coronavirus from Patients with Pneumonia in China, 2019* **describes how the scientists arrived at the idea of COVID-19:** they took lung fluid samples and extracted RNA from them using the PCR test. It admits that the coronavirus failed Koch’s postulates:

“Further development of accurate and rapid methods to identify unknown respiratory pathogens is still needed ... **our study does not fulfill Koch’s postulates.**”

Are RNA Samples and a Genetic Sequence Proof of a New Coronavirus?

David Crowe doesn’t believe there is even sufficient evidence to justify calling this a new virus, let alone a pandemic. In his paper *Flaws in Coronavirus Pandemic Theory*, he writes:

“The world is suffering from a massive delusion based on the belief that a test for RNA is a test for a deadly new virus ... If the virus exists, then it should be possible to purify viral particles. From these particles RNA can be extracted and should match the RNA used in this test. **Until this is done it is possible that the RNA comes from another source,** which could be the cells of the patient, bacteria, fungi, etc. There might be an association with elevated levels of this RNA and illness, but that is not proof that the RNA is from a virus. Without purification and characterization of virus particles, it cannot be accepted that an RNA test is proof that a virus is present.

Definitions of important diseases are surprisingly loose, perhaps embarrassingly so. A couple of symptoms, maybe contact with a previous patient, and a test of unknown accuracy, is all you often need. While the definition of SARS, an earlier coronavirus panic, was self-limiting, the definition of the new coronavirus disease is open-ended, allowing the imaginary epidemic to grow. Putting aside the existence of the virus, if the coronavirus test has a problem with false positives (as all biological tests do) then testing an uninfected population will produce only false-positive tests, and the definition of the disease will allow the epidemic to go on forever.

This strange new disease, officially named COVID-19, has none of its own symptoms. Fever and cough, previously blamed on uncountable viruses and bacteria, as well as environmental contaminants, are most common, as well as abnormal lung images, despite those being found in healthy people.”

He concludes:

“The coronavirus panic is just that, an irrational panic, based on an unproven RNA test, that has never been connected to a virus. And which won’t be connected to a virus unless the virus is purified. Furthermore, even if the test can detect a novel virus the presence of a virus is not proof that it is the cause of the severe symptoms that some people who test positive experience (but not all who test positive). Finally, even if the test can

detect a virus, and it is dangerous, we do not know what the rate of false positives is. And even a 1% false positive rate could produce 100,000 false positive results just in a city the size of Wuhan and could mean that a significant fraction of the positive test results being found are false positives.

The use of powerful drugs because doctors are convinced that they have a particularly potent virus on their hands, especially in older people, with pre-existing health conditions, is likely to lead to many deaths. As with SARS.

There is very little science happening. There is a rush to explain everything that is happening in a way that does not question the viral paradigm, does not question the meaningfulness of test results, and that promotes the use of untested antiviral drugs.”

Yes, anti-viral drugs (**which do a lot of damage to your body**), and, more to the point, mandatory vaccinations.

We All Have Viruses, All The Time, as Part of our Virome and Immune System

Speaking of the “viral paradigm”, if you haven’t already seen it, please check out my earlier article *Deep Down the Virus Rabbit Hole – Question Everything* which introduces the idea that viruses are not what you think. The humble virus is deeply misunderstood. The human body is composed of an estimated 6 trillion cells, 60 trillion bacteria and 380 trillion viruses. Just as we have a microbiome of friendly bacteria which forms the basis of our immune system and 2nd brain in our gut, so too do we have a **virome** (a collection and community of viruses) which play a role in our healing. Through the ascendancy of germ theory over host theory/terrain theory, **the mainstream paradigm now teaches that viruses are “bad guys”, infectious agents out there, who can invade the body – thus reinforcing the need for Big Pharma drugs and vaccines.** Viruses come from exosomes or tiny particles our bodies produce. They are not infectious agents. The exosome theory states that if cells are poisoned, they produce viruses (secretions) to clean up the toxins. This is what the plant kingdom does; when a tree has a beetle infestation, it makes a hormonal secretion to tell other trees to defend themselves.

Thus, *Operation Coronavirus* is not only a fake pandemic, but also a colossal and unprecedented **worldwide psy-op, based on exploiting our ignorance over the true nature of viruses.** What a scam!!

Fake Tests for a Fake Pandemic

Insiders and whistleblowers such as the one in the article *Insider Exposes COVID-19 Coronavirus Scam* have revealed how there are coronavirus test kits being distributed which don’t even test for the specific SARS-CoV2 strain! They just test for generic coronavirus (coronavirus is defined as the “common cold” in medical encyclopedias) which of course will produce more false positive (as the **NWO agenda** dictates). Meanwhile, the Medical Industry relies on the PCR test which I have exposed in other articles as wholly inadequate. The **PCR Test is a surrogate test since it doesn’t actually isolate the virus.** The founder of the PCR test Kary Mullins has admitted that you can’t use PCR to prove infectious etiology or to diagnose an infectious disease. Besides, you can manipulate the results PCR will yield by choosing how many cycles (amplifications) to run. For some diseases, if you lower the number of cycles to 35, it can make everyone appear negative, while if you increase them to above 35, it can make everyone appear positive.

COVID-19 Umbrella Term: Remember there is Not one cause and Not one disease

Many people are grasping the importance of all the above information, and are now rightly asking: what is actually happening, if viruses cannot spread? What are people getting sick from? What is causing all the disease?

Before addressing that, it's crucial to understand this one point: there is not 1 virus, there is not 1 cause and there is not 1 disease.

The NWO (New World Order) propagandists have created the appearance of an international pandemic by exploiting many common assumptions people have, including the idea of 1 disease caused by 1 infectious agent. Remember, the COVID-19 umbrella term can cover numerous symptoms (coughing, shortness of breath, increased mucus, fatigue, etc.) which may be caused by any number of things. Jon Rappaport wrote this piece on April 1st, very appropriately since it was April Fools Day:

“I keep pounding on this, because it's the main illusion, and it's the hardest illusion to dispel. People hang on to it like a life raft. The stage magicians present the “pandemic” as one disease with one cause, and people buy in immediately. Some people who reject the coronavirus as the cause present ANOTHER single cause—they're falling for the basic con job. There are people in Wuhan who have pneumonia because of the horrendous air quality in the city. There are people in New York who have ordinary flu-like illness. There are people in Italy who have histories of multiple, long-term, serious health conditions—pneumonia, flu, cardiac problems, kidney problems—made far worse through treatment with toxic drugs. There are people in hospitals around the world who, after being diagnosed with COVID, are dosed with powerful toxic antiviral drugs. There are people on breathing ventilators who are being given too much oxygen and too much pressure—and their lungs collapse. There are perfectly healthy people who are testing positive for the virus because the test is irreparably flawed... All these people are called “COVID cases.”

The stage magic trick is easy to see, once you grasp the tactics: Claim to have discovered a new virus. Say it is spreading and needs to be contained. **Invent an umbrella label for the epidemic: COVID-19.** Start pulling all sorts of people with all sorts of different conditions under the umbrella and say they're all “cases.” Use a diagnostic test that will automatically turn out many verdicts of “infected.” And you have the illusion of a pandemic.

Or you might get this: “No, it's not the coronavirus, it's really 5G technology that's making people sick and killing them.” STILL falling for the magic trick. In certain places, 5G might be harming people. Indeed. And some of those people might be labeled as COVID. Yes. But “the whole thing” isn't 5G, because THERE ISN'T ONE WHOLE THING. There is no “it.”

This is the illusion we need to dispel: there is not one cause and there is not one disease.

COVID-19 Umbrella Term Fakery: If All Different Kinds of Disease are Being Falsely Ascribed to COVID-19, What is Happening?

This frontline NYC doctor Cameron Kyle-Sidell states from firsthand experience that he is seeing a lot of patients been brought in and suffering from what seems like altitude sickness, a severe shortness of breath and **lack of oxygen**. He thinks they should be treated for hypoxemia (a condition where the oxygen content in the arterial blood is below normal, like altitude sickness) and not for ARDS (Acute Respiratory Distress Syndrome, by definition a respiratory disease). This means less use of ventilators and breathing tubes, because as he says, **it is highly likely the pressure from the ventilators may be damaging patients' lungs. They need oxygen not pressure.** He states that apparent COVID-19

patients do not appear to be suffering from anything resembling viral pneumonia.

When many people break out with a disease in the same region, it is easy to assume they are “catching” it from one another. Bill Gates-Netflix propaganda (the Netflix *Explained* series episode titled *The Next Pandemic*) reinforce this programming. However this is an assumption. It is just as possible the people in a certain geographical area are all being subjected to the same poison and thus reacting in the same way. In other words, it could be because of a local contaminant rather than an infectious agent. What appears like contagion may actually be **the consequence of mass long-term poisoning**, but governments and corporations are never going to confess to that when they have a scapegoat killer virus they can blame instead.

So what are the causes? There are too many to list. For starters, many COVID-19 are false positive cases or **died with the virus but not from the virus**. Many other COVID-19 patients are elderly, have compromised immune systems or have co-morbidities. On top of that, consider the following:

- 1. Air pollution:** the air in Wuhan China and Milan Italy is notoriously bad. Many of the symptoms people experienced there are perfectly explainable due to the atrocious air quality;
- 2. GMOs:** GM crops, and thus glyphosate, have long contaminated the global food supply;
- 3. Biofuel made with GM corn:** as Dr. Thomas Cowan speculates in this video, GM corn biofuel is now used in place of regular fuel. What happens when it is burned, used up and dispersed into the air for everyone to breathe in all the GMOs and glyphosate?;
- 4. Vaccines:** the residents of Wuhan were reportedly mass vaccinated before the outbreak;
China: Vaccine Law Passed. According to the Law, China is to implement a state immunization program, and residents living within the territory of China are legally obligated to be vaccinated with immunization program vaccines, which are provided by the government free of charge. The Law will take effect on December 1, 2019.
- 5. EMF (Wi-Fi and 5G):** the word has got out that the 5G 60GHz frequency **interferes with oxygen absorption**. Is it just a coincidence that the NHY doc above is revealing that people now have symptoms of hypoxemia or hypoxia?
- 6. Chemtrails / Geoengineering:** the ongoing spraying of our skies is one of the most serious crimes against humanity. Aerosol concoctions of aluminum, strontium and barium, plus mycotoxins and synthetic life, have been sprayed in the air in virtually every part of the world for at least 10-15 years. There has been ample time for these particulates to invade our bodies. What horrible long-term effects are going to happen because of this?

There are many more. This is not an exhaustive list. The point is that there are many causes and many diseases occurring right now which are being lumped under the term COVID-19 to bolster the illusion of a raging pandemic.

Final Thoughts: Is this a Pandemic or a Scamdemic?

If you didn't know the history of fake pandemics, you might think that the WHO (World Health Organization), the USG (United States Government) and other world governments would have solid evidence for declaring a health emergency. They don't. Asking key fundamental questions about how the nature of the COVID-19 disease, and how the virus is being isolated and tested, reveal **a house of cards. There are serious fundamental flaws in the pandemic propaganda.** This is unadulterated COVID-19 umbrella term fakery. What is happening here is not some wild killer virus, but a carefully crafted script to engineer a worldwide crisis and to blame mass long-term poisoning on a tiny invisible particle whose existence has yet to be conclusively proven as an infectious agent.
